EDUCATION

Florida Polytechnic University

Graduating: May 2027

Bachelor of Science (BS): **Computer Science – Advanced Topics**

Lakeland, FL

Relevant Coursework: **Applied Deep Learning, Artificial Intelligence, Data Structures and Algorithms, Object-Oriented Programming**, Database 1, **Machine Learning**, Computer Networks, Systems Design, Computation with Python, Web Developing, System Administration with Unix, NLP, Operating Systems, UI/UX

SKILLS

Programming: Python, Java, C++, C, React, TypeScript, JavaScript, PostgreSQL, SQL, HTML, CSS, ActionScripts

Framework and Libraries: React, Node.js, FastAPI, Flask, PyTorch, TensorFlow, jQuery, Three.js

Developer Tools: AWS EC2, Frostbite, Linux/Unix, VS Cide, Docker, Kubernetes, PyCharm, Jira, Oracle Live SQL, Oracle VirtualBox, Power BI, YOLOv8, OpenCV, TensorRT, Unity Game Engine, , Git, GitHub, GCP

WORK EXPERIENCE

Electronic Arts

May 2026 – August 2026

Software Engineering Intern

Orlando, FL

- Developed **2 gameplay systems in C++** for Madden 27 Franchise Mode, including dynamic salary cap settings
- Debugged **10+ gameplay bugs across platforms**, identifying root causes and implementing fixes.
- Contributed to backend gameplay logic and UI functionality, testing features for cross-platform stability.
- Collaborated with engineering and QA teams, using **Jira and Frostbite** to track and deliver features.

Freelancer

September 2022 – May 2026

Front-End Web Developer and Designer

Orlando, FL

- Designed and implemented custom workflows, data structures, and UI components across **50+ responsive apps**
- Collaborated with **35+ clients** to gather, analyze, and translate business requirements into technical specifications
- Integrated APIs, optimized performance, and conducted unit testing to ensure high-quality functionality

PROJECTS

VisionSeek: Object Detection and Classification

May 2025 – Current

Python, PyTorch, TensorFlow, YOLOv8, OpenCV, Labelling, Flask, AWS EC2, Raspberry Pi, TensorRT

- Built and optimized a hair-type detection model using **YOLOv8**, achieving real-time inference under **60 ms** per frame
- Improved model accuracy with **3×** data augmentation, preprocessing, and transfer learning on cloud GPUs.
- Deployed the model for live video detection using **Flask, TensorRT**, and **Raspberry Pi** edge devices.

Comparative Analysis of AI Coding Assistants

March 2026 – May 2026

Python, FastAPI, React, SQLite, SQLAlchemy, OpenRouter APIs, Axios

- Developed a platform using FastAPI, React, and SQLite to **evaluate 5 AI assistants across 8 programming tasks**.
- Engineered an automated evaluation pipeline **measuring correctness, runtime, memory, security, and readability**.
- **Integrated 5 LLM APIs** through OpenRouter with standardized prompts and automated execution.
- Built REST APIs and dashboard to **manage 100+ evaluation runs**, generate reports, and assistant performance.

LEADERSHIP

Region 7 Program Director

May 2025 – June 2026

Society of Hispanic Professional Engineers Regional Team

Lakeland, FL

- Develop and maintain funding timelines for Region 7 spring events and chapter programming.
- Serve as the first point of contact for regional event funding requests, ideas, and program proposals.
- Coordinate Region 7 National Convention meetups and collaborate with chapters on regional programming.

President – previously Marketing VP for 2 years

May 2025 – June 2026

Society of Hispanic Professional Engineers

Lakeland, FL

- Doubled membership on campus with 40+ students on average per event.
- Led an executive board of 8 officers to plan event and manage outreach for our chapter.
- Oversaw 12+ events and initiatives to support member development
